Avian Veterinarian Assessment & Approval for Boarding

(updated Nov. 2023)

For the health and safety of our birds and yours, the following must be done **annually** to come on-site for boarding or grooming.

- **Full exam with a certified avian veterinarian including the following labwork:**
 - **Standard Avian Blood Panel with CBC & Chemistry**
 - **Gram stain**

Please note that the full veterinary report, including labwork results and the veterinarian's commentary about them and the overall health of your bird must be sent directly to staff at freeflightbirds@live.com **before** your bird comes on-site. A boarding reservation can only be made once these documents have been received. Free Flight reserves the right to cancel a scheduled boarding if a bird's vetwork is not up to date.

THANK YOU!
